

Welcome

O2h welcomes you to its first newsletter in 2011. Since 2003, O2h has been providing multiple FTE chemistry and ADME collaborations to clients across the globe. The O2h team has now grown to over 125 scientific staff and operates from a modern 10,000 sq mt research campus in India.

O2h, co-located in Cambridge, UK, has designed its discovery services model with speed and real-time communications at its core.

O2h now offering a wider range of services for its clients.

2011 has brought a new chapter in the evolution of O2h. We are now a part of the Piramal Healthcare group of companies, one of the world's largest publicly listed contract development and manufacturing organizations (CDMO).

Formulations, API manufacturing, GMP synthesis, contract manufacturing, clinical trial supplies are a few of the services which O2h clients can now access. Technology transfer protocols are being put in place, to enable seamless access to these broadened capabilities.

O2h is continuously upgrading its chemistry capabilities to improve delivery speed and has recently added a UPLC-MS and further flash purification systems. We are also expanding our repertoire of ADME assays, so please get in touch if you would like more information.

Piramal Pharma Solutions

Piramal Pharma Solutions is a part of Piramal Healthcare, and offers a wide range of pharma solution services from API and formulation development to manufacturing for early phase clinical trials drugs to late stage commercial manufacturing scale.

Piramal has multiple sites in the UK, India as well a site in Toronto, Canada. Apart from these, they have offices in Shanghai and locations across Europe and the US.

Karyopharm extends its ongoing collaboration with O2h

O2h now provides substantial chemistry as well as ADME support to Boston, USA based biotech company - Karyopharm Inc.

O2h Women In Science Open Day 2011

O2h's Women in Science Open day organized on the 11th of February was attended by over 160 students. This initiative, in its 4th year, is an annual event aimed at encouraging women students to pursue meaningful and exciting careers in research.

Come and meet the O2h team

O2h will be present at the following events. Get in touch to meet with us!

RSC Fragment based discovery conference
GSK Campus, Stevenage, UK; 7-8 March 2011

BioSpring 2011
Milan, Italy; 13-16 March 2011

BioTrinity 2011
Newbury, UK; 12-14 April 2011

Community service initiatives

O2h believes in being connected with the world outside of its labs and being an active participant, sharing our time and energy with various social initiatives in and around the city.

One of the initiatives that O2h employees regularly participate in, is the voluntary teaching program organized by Avbodh IQG. This program is aimed at children in disadvantaged neighborhoods in villages surrounding Ahmedabad.

Apart from this, O2h employees regularly organize blood donation drives at the Shirish research campus. A third of the employees at the Shirish research campus donated blood during this event.
